

## **Instructions Prior to Circumcision**

- Please feed your baby at home right before coming to appointment, this way he/she is satisfied, but does not have an extremely full tummy during the procedure
- Please administer a dose of Tylenol to your baby prior to coming to his appointment - see attached dosing sheet
- Please bring a blanket for your baby to be used during the procedure
- Please bring a snack/distraction for yourself and any other children as you will be here for a while
- Your baby will need to have some form of antibiotic ointment applied with each diaper change after the procedure until healed ie. neosporin, polysporin etc...
- Please call the office if your baby develops a diaper rash prior to his circumcision appointment

**If you have any questions regarding these recommendations, please contact our office at (208) 746-1383 ext. 5595.**
